DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5 allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art Zakhor et al (US 5, 669, 121) which discloses generating a block basis motion compensated frames, each one being obtained from each current original frame and a previous reconstructed frame, generating from said motion-compensated frames residual signals; and using a matching pursuit (MP) algorithm for decomposing each of said generated residual signals into coded dictionary functions called atoms, the other blocks of the current frame being processed by means of other coding techniques; Zakhor et al does not teach any atom acts only on one block B at a time, said block-restriction leading to the fact that the reconstruction of a residual signal f is obtained from a dictionary that is composed of basis functions $g_{\gamma}|_B$ restricted to the block B corresponding to the indexing parameter γ_n , according to the following 2D spatial domain operation: $g_{\gamma}|_B(i,j)=g_{\gamma}(i,j)$ if pixel $(i,j) \in B$; $g_{\gamma}|_B(i,j)=0$ otherwise (i.e. $(i,j) \notin B$).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
